

Harsh Dwivedi

With 10+ years of experience in CRM Domain. To pursue a career with a global organization, which sustain my ability to work and provide an opportunity to increase knowledge. Aiming to best utilize my knowledge and learn new experience. To give my best towards the success of organization and myself.

Professional Experience

Accenture Solutions Pvt. Ltd. || Application Development Team Lead || Sep 2022 - Present

- Developed an internal AI agent to accelerate root cause analysis and identify patterns in system logs, successfully reducing manual toil and decreasing troubleshooting time by 10 hours per week.
- Partnered with cross-functional engineering teams to monitor, analyze, and optimize performance across complex distributed systems, successfully migrating enterprise applications to AWS cloud-native architectures.
- Integrated automated performance testing and regression detection into CI/CD pipelines using DevTest, achieving autonomous validation of enterprise integrations and cutting regression issues.
- Conducted continuous internal platform monitoring to uncover performance issues, providing Data - driven, actionable insights to development teams that decreased pre-production bottlenecks.
- Root cause analysis and troubleshooting to resolve critical production incidents and improve system reliability.

Sesat Solutions Pvt. Ltd. || Senior Siebel Developer || Oct 2021 - Sep 2022

- Automated tasks to reduce business dependencies.
- Optimized legacy database procedures to align with the upgraded architecture, enhancing debugging efficiency and system performance.
- Customized HTML/CSS and OpenUI components to enhance user experience and resolve UI defects.
- Collaborated with stakeholders to prioritize fixes and ensure smooth business transition.

Wipro Technologies Ltd. || Siebel Developer / Consultant || July 2015 - Oct 2021

- Led multiple Siebel CRM upgrades including 8.1.1.5 to IP13, and IP13 to IP20.5 on AWS Cloud.
- Migrated Siebel eChannel from SI to OpenUI, including CSS and SWT customization to resolve UI issues.
- Redesigned ODBC-based logic using stored procedures post-Oracle 19C upgrade.
- Developed custom Business Services and VBCs to enable REST API calls in legacy Siebel versions.
- Implemented LDAP authentication, replacing DB-based login mechanism.
- Performed admin tasks like Siebel deployments, AOM creation, and configuration.
- Built virtual services using DevTest to test Outbound Web Services independently.
- Delivered complete Siebel Campaign Management solutions including template creation, delivery, and user training.
- Handled Siebel workflows, UI bug fixes, client support, and business requirement gathering.
